

CLAIMS

I claim

1. The Nappy Locs Tool comprising:

a needle shaft having a first end and a second end, said first end defining a tail;

a bulb proximate said second end, wherein said bulb is defined by oval portion beginning at end of said tail portion and ending at the beginning of said pinch portion;

a pinch portion adjacent to said bulb portion, for retaining sections of hair being defined by an opening reduced in width relative to said bulb.

2. The Nappy Locs Tool according to claim 1, wherein said needle is made of a metallic material.

3. The Nappy Locs Tool according to claim 1, wherein said pinched portion terminal end is round.

4. The Nappy Locs Tool according to claim 1, wherein said tail portion terminal end is round.
